

Team Agility

Developing Teams That Work Together As One

Behavioral and organizational change are accelerated through experiences that focus on performance, collaboration, and overcoming adversity.

Team Agility is an experiential program for teams and team leaders in partnership with The Rowers' Code™. Using rowing as a metaphor, the workshops develop teams that work together as one, so they are more agile and effective. Imagine if you could bring the power, teamwork, and laser focus of an Olympic rowing team to your business!

Program Highlights

Sage Ways delivers two powerful Team Agility programs.

Experience the Power of Teamwork. The team workshop is an intensive application experience where participants focus on building skills they can easily use in any challenging situation. It's taught as a one-day workshop either on or off-site. Teams will experience:

- Increased trust and a "one boat" mindset.
- Improved goal sharing and alignment.
- The power of collaboration.

Experience the Power of Leadership. Management is not leadership. The leadership workshop focuses on performance gained through leadership. These workshops help managers step up to the leadership challenge, motivate their team, and impact productivity. Managers will learn to:

- Build on the ideas and strengths of each team member.
- Learn to quickly assess and adapt to change.
- Create a safe environment where people can work out issues together.

Participants find their experience with Team Agility to be invaluable:

"Implementing The Rowers Code Program strengthened our commitment to improving results through teamwork. Our employees challenged the organization to higher levels of service and excellence. And it was FUN."

Who Should Attend

1. **MANAGERS.** Managers who are new or experienced will benefit from the program. Managers who are leading newly formed teams will get a jump start on unifying the team.
2. **TEAM MEMBERS.** New or struggling teams can achieve optimum unity as one team. Teams of all sizes will benefit from principles and experiences of Team Agility.
